Total employees : 200

2012 Turnover : 20 M€

Certifications :

- ISO 9001
- ISO 14001
- COFRAC

Our customers :

CEA Cadarache, Grenoble,
Pierrelatte, Valduc, Bruyère
le Châtel, Mons, Saclay, ...
Ganil, SDMS, Inficon,
Adixen, CESTA, EDF,
Cogema, FBFC, ESRF, ILL,
CERN, ONERA, AREVA,
Institut P. Scherrer...

For 25 years, 40-30 focuses on Vacuum technologies, Electronic and Radio Frequency, Mechanical parts and Sub-Assembly Cleaning for cleanliness applications and non-destructive tests. To meet your needs, we are proud to have developed 5 Business Units: Maintenance; Training; Spare Center; Engineering; Sales Representation.

Maintenance

/ Vacuum technology / Gas analysis
/ Electronics / Electrotechnics
/ Cleaning & ultraclean reconditioning
/ Interventions on production & laboratory equipment
25 000 interventions p/a - Interventions done in our workshops & on the customer's site - On customer's site support - Intervention on equipment - 3000 on the customer's site interventions - Specialists delegation - 2x8 - 7/7- CEFRI & COFREND (ICNDT-International Committee for Non Destructive Testing)

Training

Micro & Nano Technologies

/ Decrease of maintenance costs
/ Identification and comprehension of default parameters
/ Reliability of the equipment
/ Improvement of the productivity and of the availability rate of the equipment
/ Understanding of the failures
/ Increase of your maintenance independence

Spare Center

An alternative to repairs, an immediate availability of the spare parts
/ Supply of spare parts, sub-assemblies & reconditioned equipment

Order now on www.sparesby4030.com

Engineering

/ Design of test benches and test systems dedicated to the maintenance and control of sub-assemblies.
/ Improvement of the reliability and hardening of sub-assemblies and equipment.
FMEA approach, re-engineering.
/ Upgrades and modifications of equipment using vacuum technologies, gas analysis, radio frequencies and plasmas.
/ Development and adjustment of procedures for decontamination, ultraclean cleaning, degassing.
/ Organisation and implementation of workshops and maintenance positions.
/ Advice on maintenance strategy.
Methodology, programme, frequency, level of integration.
/ Elaboration of leak test procedure.
COFREND LT level 3 (ICNDT – International Committee for Non-Destructive Testing).
/ Engineering and writing of maintenance procedures.

Control your procedures & perpetuate your know-how in maintenance

/ AMPS (Advanced Management Procedures System) is a software developed on the basis of our experience in maintenance to create, manage, carry out procedures and also ensure the supervision of their fulfillment.

Sales Representation

Partnership: we take care of your after-sale service
/ Manufacturers trust our ability to represent them & also our aptitude to bring an efficient support to their own clients.
